

1814S Static Square Bale Wrapper

LARGE SQUARE STATIC WRAPPER

The 1814 S is an extremely compact and efficient square and round bale wrapper. It is ideal for contractors who wish to wrap at the point of stacking.

The wrapper is fully automatic and can be operated via radio remote control from the tractor cab. While wrapping, the operator can stack wrapped silage bales and prepare loading the next bale.

This agricultural wrapping machine is also very versatile. The bale wrapper has hydraulically adjustable rollers which can be quickly changed to fit bale sizes of 0.6m to 1.4m in height to a maximum of 2m in length. The height levels are also independently hydraulically adjustable at the front and rear to ensure a sturdy position.

The stand alone machine has a twin bale wrap sequence.

1814 SERIES Features

STANDARD FEATURES

- RDS Expert Controller
- Remote Control
- Automatic Bale Leveling & Indexing
- 20HP Kubota Engine
- Oil Cooler

OPTIONAL EXTRAS

- 1814 Twin Arm Kit
- Off-Load Conveyor
- Round Bale Kit

KUBOTA POWER PACK

The 1814 S is fitted with a 20 horse power Kubota diesel engine and oil cooler kit as standard.

RDS CONTROLLER

The fully automatic remote control can be operated from the tractor via the Radio Remote Control which is standard.

HYDRAULICALLY ADJUSTABLE ROLLERS

The width of the Rock 'n' Rollers can be hydraulically adjusted meaning quick and efficient changeover for different sized bales.
